Certificate of Origin

Gelatin Hydrolysate Type B

Primarch's Gelatin Hydrolysates derived from grass-fed bovine hides and/or Bovine Bones are produced in Addison, IL (U.S.A.) exclusively from non-B.S.E. affected bovine collagen. The list of countries at this time consists of Brazil, Argentina, New Zealand, Columbia, Paraguay, Uruguay, and India. Your custom-made product may be made from various blends of material from these countries.

All of the materials from which the gelatin is extracted are from animals that have received documented veterinary inspections and were deemed healthy and fit for human consumption.

Without this documentation, the regulatory agencies will not allow the gelatin to enter our plant since it is subject to the inspection and approval of both the F.D.A. and the U.S.D.A.

A handwritten signature in black ink, appearing to read "Chris Green", is written in a cursive style.
